gp-Untis
Timetable Software

GENERAL INFORMATION

Gp-Untis : Timetabling software

This is an extremely powerful timetabling program which is used by over 15,000 schools world-wide - including a growing number in the UK. The program is produced by Gruber& Petters Software, an Austrian company at whose web-site you can find full details of the package: go to www.grupet.com. **We also welcome informal telephone enquiries.**

What's included?

A powerful timetabling package which can quickly be tailored to the exact timetabling needs of your school. The software can import and export data to and from most school administration software. There is also an optional staff substitution module enabling you to manage cover arrangements efficiently as well as numerous other modules which enhance various aspects of the program. You can add these at a later date as you become more familiar with the program.

What about support and training?

By paying an **annual subscription** you automatically receive all upgrades to the program (there is normally an annual upgrade). **The software manufacturers are also very keen to respond to suggestions from schools about improvements to the program.**

The annual subscription also entitles you to unlimited telephone and e-mail support from The School Timetable Company, who operate in partnership with Gruber & Petters. For details of The School Timetable Company go to our web-site at www.school-timetable.co.uk or contact us on 013398 86899.

The School Timetable Company provides high quality **in-school training** in the use of the program at the request of schools.

Special Introductory Package

If you order *gp-Untis* from us you can opt to purchase this special package which includes :

- installation of the program
- basic data imported into gp-Untis from your administration system
- one day's training in school on *gp-Untis* for up to 6 staff
- a year's free annual subscription.

Software Licences

Test Licence

A test licence is available from us – call for details.

Full Licence

The cost of a full licence is based on the size of your school, and will be discounted for schools which opt for the special Introductory Package or which take out an annual subscription at the same time. There is also a discount for local authorities taking out licences for several schools. Call for full details for your school, college or local authority.

Annual Subscription

This entitles you to an annual upgrade and full support. It costs £125.00 per annum. Another benefit is that you will automatically receive an invitation to any workshops or seminars we are offering on using the software. We normally expect schools to maintain their subscriptions for at least two years after which the cost is discounted.

NEW Annual Subscription PLUS All the benefits of an Annual Subscription PLUS an annual support visit to your school with support or training available for up to 6 of your staff. Call for full details or submit the form on our website.
